

**INDO-FRENCH CENTRE
FOR APPLIED MATHEMATICS (IFCAM)**
Indian Institute of Science, Bangalore

Call for Proposals

The Indo-French Centre for Applied Mathematics (IFCAM) has been jointly set up by the Indian and French Governments at the Indian Institute of Science, Bangalore as an international joint research unit. IFCAM is designed as a platform for cooperation in mathematical sciences with the primary focus being the area of applied mathematics.

IFCAM funds joint research projects between Indian and French investigators in the area of applied mathematics (interpreted broadly to include projects in other areas like engineering and physics as long as they have non-trivial mathematical content), exchange visits of faculty and students (within the ambit of a research collaboration), joint research workshops, and visits by Indian researchers (particularly from universities and colleges) to IFCAM. In addition, there are targeted funds made available by various French institutions for visits, PhD scholarships etc. Indian researchers and students can apply to the concerned French institution for these targeted activities. Further details on all of the above can be obtained from the IFCAM web site:

<http://math.iisc.ac.in/~ifcam/>

Proposals for joint research projects and research workshops are invited from Indian and French researchers. Each project should have an Indian and French principal investigator. Proposals should be in the format given on the IFCAM web site. The last date for submission is **April 30, 2018**. Completed proposals should be sent by email to ifcam.imi@iisc.ac.in and hard copies should be sent to the following address:
